## Recommended Articulating Arm/Platform Applications

*Where and when to specify articulating keyboard systems*

**90° Corners** – Measure for 17" or 21" tracks. Slimline platforms Diagonal DPP, Slide-through PSP or dual swing-out PSCP platform. Corner makers are available if you need additional work surface. Use any platform on straight surfaces.

**Diagonal Corners** – Can use any arm with 21" tracks, but extended arms are still preferable due to the additional flexibility afforded by the extended arm. Care should be taken with PSP slide-through or the DPP rectangular platform.

**Radius Corners** – Swing-out mouse tray function is preferable so that there is full access to the mouse. The PSCP dual swing-out, PHP single mouse tray systems are recommended.

**Wave Corners** – Can use any arm with 21" tracks, but extended arms are still preferable due to the additional flexibility afforded by the extended arm. Care should be taken with PSP slide-through or the PDP rectangular platform.
